THE EVERGLADES NEWS

Governor John W. Martin and I clashed at the drainage conference in West Palm Beach last week. As last week's issue of the Everglades News shows, I went to the conference representing the governor stood for what the residents of the Glades wanted and I was prepared to be for him; I went there certain I would succeed against him, that certain, I was destined to see from his two-hour speech that he was using F. C. Elliot's figures and arguments, both of which were wrong.

The governor's treatment of R. E. Kurz was unfair. When I saw how Mr. Kurz was treated I made a resolution that I was not going to be trapped and I planned my entrance and conduct to give a rise out of the governor's attitude. I had a long conference had just jumped on Kurz at the end of Kurz's speech, the governor was liable to jump on me at the end of my speech if I didn't say something to prevent that. So I told the governor and Howard Sharp would let it out at the beginning and not let him have the advantage of the last word.

It would have been more politic if Governor Martin at some time else—there had been a good deal of comment on the fact that the governor did take the chair and was running the meeting, which changed it from a conference to something else; this was my desire to add the statement that was around the tents at Kurz to the resentment against the attempted one-man dominance of the meeting. So I addressed the governor and chairman of the "Tea master" and got a rise out of him and if that had not accomplished it I had something else up my sleeve. I was still worried in the least by his interruptions; it suited me exactly, for it suited me to have him jump in the field and give me a chance to proceed without further interruptions and without fear that the governor or any other member of the board would have a come-back at the close of my talk.

The audience had noticed that when a speaker patted the governor on the back or commended the Tallahassee, but I never did want to do that if I was there to say what was on his mind, the governor-chairman argued with him. Even the side-line spectators saw that it wasn't fair play so I went to the governor and said, "try a come-back at the close of my talk, he would hurt himself further." The net result of the skirmish was that I finished my talk in my own time and in my own way and without the chairman of the last word being left with the chairman.

I'm a newspaper man and I'm working at my trade; the governor is a lawyer and a politician and he's working at his trade. I have no right to be at his. He has position, prestige and skill; more than he has power, and he has power that can be used without outward sign of it. Use is the main thing wrong in this drainage matter and I am sure that I have any reason to fear that his position greatest skill and power can overcome the right.

I've studied politics for a long time and I have learned something about the machinery of politics and the methods of politicians. The last resort of a politician who is beaten in argument is to say he is being abused. The of fighting political battles is to command his troops, his henchmen, his experience and a certain power of combatting attack with argument. But if his record is vulnerable, his henchmen are all the same, and he is unreliable as a leader, his experience in particular makes short and his argument unsound—then his attacks have been without effect. There is always that last thing left to do, which can say he is being abused. Governor Martin says I have been abusing him.

If the Tallahassee crowd want to say something about me I put it in their hands to do it. I've given them a lead to it. I've made my argument available to them. I've iterated it. I've listed all the places I've lived at; and those who want to get something on me to prove to the drainage district. Only by intelligent use of the existing facilities can profitable use be made of the millions of dollars invested in the drainage enterprise. To pay our taxes we must be permitted to use the land. We haven't been permitted to use the land because we couldn't make use of the mechanisms of the sub-districts. We can't use the mechanisms of the sub-districts, because of the manner of administration of the main district that surrounded us.

These are facts that will stand any inquisition.

There is no use trying to shift the discussion to finance and away from the situation of the people who live in the district. The financial structure must have its foundation in the labor of the people who live on the land. You have got to think of the people who are here before you can think intelligently about anything else. That is another fact that will stand inquisition by any honest committee Governor Martin can appoint. The land cannot reach down in its pocket and get the money to pay its taxes. Unless the taxes are paid all the theoretical financing isn't worth anything. The taxes to redeem the bonds must be paid in the long run by the labor of human beings.

The type of men and women whose labor will produce the largest returns is a type of men and women who will demand and secure the inherit right of citizenship, which is representation on the board that assesses the taxation.

CONFIDENCE UNSHAKEN

Some points respecting the Everglades have been settled beyond further controversy. Disclosure of this fact was a distinct achievement of the meeting held at West Palm Beach last week under the chairmanship of Governor Martin.

It hardly needs to be pointed out that one point was the evidence that the farmers in the Everglades want resident control. Another was that a great majority of the active developers want a change in the manner of government of the district that will give them a direct voice in affairs. Small farmers and big investors want a survey and inventory of the district.

But the biggest fact was the confidence in the Everglades shown by all, whether residents or investors. Everybody is prepared to go ahead.

The name of a new hotel in Miami, "The Robert Clay," a social function was held in it on opening, and a heading in a Miami paper said "Robert Clay Has Fete." Fete of Clay, etc.

President McPerson issued his Thanksgiving Day message before he got reelected from the election.

Now that Aimee McPerson knows that we Everglades are keeping our word, we will be more careful.

DRAINAGE AND COSTS

This subject, like any subject, has several points, or phases, and the importance of separate points can depend on the situation of each man who is affected by it, but there is one point on which everybody is agreed and that point is that we want the water controlled, which means that we want the land drained and we want it done as soon as can be done with economy. Now, some spillways and locks and canals and ditches and dikes are in, we want these facilities for water control made use of and not left to stand idle and we want them used with all of the advantage possible. This point is simple. It is the very starting point in the whole subject and in every phase of the subject.

If anybody doubts the absolute truth of what is said in the above paragraph we want him to stop and analyze it and think about it. Here is the first fact to think of on this 5th day of November, 1926, the day on which this is printed; the fact is this: We are not just starting the reclamation of the Everglades; the work has been under way for a great many years and many millions of dollars have been spent, and in that time and with that money some canals have been dug and some spillways and locks put in and some levees done around the lake and some dikes put in and big pumps installed in separate areas called sub-districts. Thousands of people are living along those canals and behind those dikes and depending on the levees to keep water from coming in and depending on the pumps to collect the water from ditches inside the dikes and dump it into canals and depending on the canals to carry the water off. There are spillways with mechanisms to keep the water high or let it go low. Think about these things—think about these people who are here, who are in daily touch with these matters; think about the good reason there must be for operating these spillways else they would not be here. These mechanisms for water control are not automatic; they have to have human control—some one has to make decision when they shall be opened and how. That is the very starting point when we want to talk fairly and think reasonably about the state of affairs in Everglades drainage district. We have got to think about the things that exist and are at hand, which are the people who live here and the works of the drainage system. This is the simple point that was referred to at the outset.

We go back to the second paragraph of this article, which says that we have millions of dollars invested in a plant, an enterprise a business that thousands of persons are interested in—vitally interested in, for it not only concerns their bread and butter, it concerns their very lives. The interest charge on the money the taxpayers have borrowed through the ministerial agency of the commissioners amounts to more than half a million dollars a year, or about \$50,000 a month. We have got to get to make enough money out of the business to pay the interest charges or we will go broke and go into bankruptcy. This is taking sense. Everybody knows it if they stop to think and apply the same rule to this drainage enterprise that they must apply to any business, and this drainage enterprise ought to be handled as a business proposition. All right, so much for the main district, the district that is run from Tallahassee.

Now, there is another point that comes in after that. There are sub-districts—small districts inside the big districts. These districts have their separate systems of drainage for local protection. To get the auxiliary systems the people owning land in the sub-districts took on the obligation to pay additional taxes; just as we have to pay state taxes we also have to pay county taxes.

We have our farms and our businesses and our homes in these sub-districts. The works in the sub-districts cost us money; our properties are under a lien to pay the bonds issued to get the money, but we are not permitted to control the canals through which the water pumped off the land must run. That is the heart of the matter. It is not a problem; it is a condition. It isn't a thing that calls for solution, because there is no question. There is nothing to be solved. It is a matter that changed. It must be changed for the reasons stated in the third paragraph of this article—the manner of use of the existing facilities is a life and death matter to the people who live here; the authority to give the orders for the opening or closing of spillways and the use of all of the drainage facilities must be in the hands of the people who are using the land affected by the drainage works. Only by intelligent use of the existing facilities can profitable use be made of the millions of dollars invested in the drainage enterprise. To pay our taxes we must be permitted to use the land. We haven't been permitted to use the land because we couldn't make use of the mechanisms of the sub-districts. We can't use the mechanisms of the sub-districts, because of the manner of administration of the main district that surrounded us.

These are facts that will stand any inquisition.

There is no use trying to shift the discussion to finance and away from the situation of the people who live in the district. The financial structure must have its foundation in the labor of the people who live on the land. You have got to think of the people who are here before you can think intelligently about anything else. That is another fact that will stand inquisition by any honest committee Governor Martin can appoint. The land cannot reach down in its pocket and get the money to pay its taxes. Unless the taxes are paid all the theoretical financing isn't worth anything. The taxes to redeem the bonds must be paid in the long run by the labor of human beings.

The type of men and women whose labor will produce the largest returns is a type of men and women who will demand and secure the inherit right of citizenship, which is representation on the board that assesses the taxation.

THE EVERGLADES NEWS, CANAL POINT, FLORIDA

THANK YOU, MY FRIENDS

Wednesday Morning, Nov. 3, I appear to have been elected county commissioner from the fifth district of Palm Beach County. I did not expect my notes that some of the men who take part in Democratic politics probably paid my defeat; the wish, probably, was that of the thoughts, and it does not seem to me that most of the east coast presents the vote for me was less than that for Mr. Johnson, the Democratic nominee for attorney general. If the conclusion isn't justified, that the "good regular party" voted against me, then the "good regular party" may be then the adding machine or the political machine made a mistake. This isn't a complaint; it is that I was successful in getting the election.

It is a fact that the election still

referred two years from now.

I seem to have had a majority on the east coast despite the apathy—I think that's the word that has been used.

A good many of the regulars in votes of "good regular party" must have been up by

votes of independent and Republicans.

The source of my support will

confirm the determination to serve all

the people without regard to how

they are listed on the registration books.

My first hand information about conditions in the Everglades and my practice of making use of the information did not strengthen me on the east coast among the "good regular party" who sustain intimate relations with Tallahassee, and my straightforward talk to the commissioners of Everglades drainage during what was then referred to as a "conference" was regarded as an affront for which I should be punished. To me who knew the weakness of the Palm Beach county politicians who dealt with the drainage district, and to those who knew also the weakness of the Tallahassee politicians themselves this is amusing and distressing. Governors and drainage commissioners as well as county commissioners and sub-district commissioners who will not face the actualities of their situation are no more permanent as political or economic factors.

My first and last statement is to repeat the view of the people of the Everglades in five and in doing so I have in mind the new machinery in the printing office, and the drainage controversies, it has put up.

As I said, the hurricane, the confusion

WOMAN'S CLUB NOTES

The Woman's Club had a most delightful meeting, at the home of Mrs. Coburn, Tuesday afternoon. Roll call was responded to with a current events. The corresponding secretary reported that R. Y. Patterson, manager and vice president of Conners Highway, approved the plan to extend the rail from the bridge to the wharf. The treasurer reported that \$600 had been received from the moonlight sail. The balance in the treasury is \$464. It was decided to have sign posts placed at the toll gates with "The Woman's Club of Canal Point Welcomes You" on them. We believe this is the first instance in the state. It was also decided to ask Mr. Pittman to place a "dangerous curve" sign the usual distance from the bridge.

A note of thanks was extended to the Long Distance Bottling Works for their donation of the soft drinks for the moonlight sail.

Mr. and Mrs. John Fultz visited on the east coast Sunday.

LARGER

HARDWARE

STOCK at the

Canal Point Lumber Yard

In addition to the Line of Hardware heretofore carried we have added

STOVES, DISHES, POTS and PANS

and other articles of Household Hardware

A separate building has been erected for the Hardware stock.

We continue to handle Lumber and all other building materials.

BASS Lumber & Supply Co.

CANAL POINT

Notice To Farmers From the Flooded Area

The Dairymans and Farmers Land Company, Okeechobee, Florida, is in position to offer you a truck farm on a share crop basis or otherwise. They will furnish the land; have it prepared and fertilized and also furnish plants and seed and other necessary farming equipment if you will get in touch with the above named organization. The above proposition is for actual dirt farmers who want to begin farming immediately, and those parties interested can get proper information through the employment division of the Chamber of Commerce of the Okeechobee Chamber of Commerce, or the Okeechobee County Agricultural Agent, or apply at Farms 2 miles north of City.

THE EVERGLADES NEWS, CANAL POINT, FLORIDA

CANAL POINT

Dr. Emory J. Thomas was out from West Palm Beach Wednesday.

W. R. Bonham, cashier of the Bank of Canal Point, made a business visit to Miami.

F. E. Bryant, president of the Bank of Canal Point, left this week on a business visit to Chicago.

Mr. and Mrs. A. B. Bourne are now occupying the new cottage at the cane tasting station, although some finishing work is still to be done on the buildings.

Charles Hodges of West Palm Beach has leased a tract of land and will plant sugar cane this winter. The land is part of the sugar company's south of the canal.

We have new crop seed in all varieties of vegetables. All kinds of seeds—see L. W. Thompson, general manager of The Exotic Gardens, Palmetto, Fla.

F. E. Tiffey and Devane Larimore have gone to the east coast to buy a lighting plant. The outfit they will buy will be used at the new plant to be built on the Larimore store.

Mr. and Mrs. Edw. Forbes and daughter and Henry Hamlin and a friend were in Canal Point Sunday for the 38th annual meeting of the W. R. and Edw. Forbes and their families to inspect the new plant. Mr. Forbes has installed in section 8.

"Take yourself, for instance. You are getting so fat that if somebody cut off your arms and legs you would look like a presentable mastodon," says Mr. E. L. Kelly. "I heard him say as a detective you would make a fine litching post, and that you had about as much chance of catching a real criminal as an elephant had of thread," says Mr. Kelly.

"Did I tell you these things? I did not. I am a detective, and I expect to pay a compliment! I keep my hot buttons. Nobody can accuse me of peddling sadness. If I cannot say something pleasant, I just keep still, for having any use to hurry in a person with whom I know I look bad this morning. Kelly and I feel worse than I look, but you need not remind me of it."

—by the McNaught Syndicate, Inc.

J. R. Rearden, foreman of the U. S. census testing station, has returned from Miami, where he spent two weeks repairing the damage done to his garage by the September hurricane. None of the members of his family suffered physical injury.

O. P. Griffin, formerly in business here, was recently given a dispensation for the disposal of the remains of his stock of merchandise. While A. E. Sasser is running his store at Fort Pierce he will go on the road as salesman for a jobbing house.

Mr. R. Rearden and P. L. Bell, engineers for the Southern Bell Telephone Company, came to Canal Point and looked over the territory, preliminary to sending in a construction crew to repair damage done to the line by the September hurricane. They said instruments would be placed here, this week.

Jack Hanlon, the famous dog-team driver of northern New York, and his wife are with us for the winter. He has one of his teams driving a teamster's mule. Mr. Hanlon has two two-horse timber team. Jack is managing Duke Tucker's restaurant and gas station, which opened for business Thursday.

William West of Pompano was a visitor on the ridge Sunday. He and Mr. Robinson looked at the Forties pump near Palmetto which Ed Forbes put in for Mr. Poland, Bell and others. Mr. West is the manager of the Hammon farm at Pompano. He was in charge of the Hammon farm at Canal Point several years ago.

The Bass Lumber & Supply Company has increased its hardware lines and in addition to extensive nail lines and similar building materials along with lumber and cement, it now has a line of household hardware. With a stock of dishpans, pans and similar articles there has been an increase in the company's volume of business. A separate building has been erected for the hardware stock.

Harry Heyman of the Heyman Supply Company, visited Canal Point and Palmetto yesterday. He came out with E. G. Carter, manager of the company's West Palm Beach house, who looks after the firm's business here. Mr. Heyman is from New York, as well as on the east coast. The Heyman Supply Company is the largest firm in South Florida in its line of vegetable packaging material and similar supplies. It makes barrels and cans in the Bahia Honda and the Isle of Pines. The Heymans have understanding of the Everglades drainage situation and its consequence of that are in sympathy with the desires of the residents.

The Hotel Stenographer

"YOU don't look so good this morning," said the House Detective. "Since when has it been your duty to tell me I am looking tough?" decried the Hotel Stenographer. "You want to know what I am doing around this desk, daily?"

"I am not sure you will be popular either, Mighty few in this world who don't like to be complimented. Kelly. Many a happy man has come to the hotel saying 'I am a good fellow, but I am a swindler and overdone to the bone' and gets away with it because there is no such thing as an underdone or overdone compliment, and the dame who feeds her husband enough laughter can get away with it."

"Take yourself, for instance. You are getting so fat that if somebody cut off your arms and legs you would look like a presentable mastodon," says Mr. E. L. Kelly. "I heard him say as a detective you would make a fine litching post, and that you had about as much chance of catching a real criminal as an elephant had of thread," says Mr. Kelly.

"Did I tell you these things? I did not. I am a detective, and I expect to pay a compliment! I keep my hot buttons. Nobody can accuse me of peddling sadness. If I cannot say something pleasant, I just keep still, for having any use to hurry in a person with whom I know I look bad this morning. Kelly and I feel worse than I look, but you need not remind me of it."

—by the McNaught Syndicate, Inc.

HALLOWEEN PARTY

Miss Daisy Purkey, who taught here during the first month of school, entertained several of her friends from Canal Point with a Hallowe'en party Saturday evening at her home in West Palm Beach.

RUN IN TWO WEEKS

Report to the Pelican Lake pump station is being made and it is expected the pumps will be running within two weeks.

"It Is Our Policy To Please"

COMMUNITY GOSSIP

"I'm a betting man—I bet 50 cents to a dollar that not one of you can guess within two years of my age," a Palmetto man said the other night to a party at Charley Danforth's Lakeview Inn. The guesses ranged from 32 to 42.

The man who had guessed 27, "on all love—I'm 27," the "portion man" said. The man who had guessed 42 spoke. He said, "Get out! Nobody could get as honest as you are in 27 years."

We are a rowdy set in Canal Point. But we're discreet, most of the time.

A party of Canal Point fellows were at a baseball game at the other end of the hall where that bunch of old sports sit around and listen to their arteries harden as they talk about their symphonies.

"I am not sure you will be popular either, Mighty few in this world who don't like to be complimented. Kelly. Many a happy man has come to the hotel saying 'I am a good fellow, but I am a swindler and overdone to the bone' and gets away with it because there is no such thing as an underdone or overdone compliment, and the dame who feeds her husband enough laughter can get away with it."

"Take yourself, for instance. You are getting so fat that if somebody cut off your arms and legs you would look like a presentable mastodon," says Mr. E. L. Kelly. "I heard him say as a detective you would make a fine litching post, and that you had about as much chance of catching a real criminal as an elephant had of thread," says Mr. Kelly.

"Did I tell you these things? I did not. I am a detective, and I expect to pay a compliment! I keep my hot buttons. Nobody can accuse me of peddling sadness. If I cannot say something pleasant, I just keep still, for having any use to hurry in a person with whom I know I look bad this morning. Kelly and I feel worse than I look, but you need not remind me of it."

WOMAN'S CLUB

There may not be so much fighting in Canal Point hereafter. Because a new rule has been adopted, happening this way:

Two fellows had been drinking and they quarreled and each threatened the other. They had to be held apart. One fellow got tired of hearing their threats against one another, so he decided to make them fight. A committee "frisked" the belligerents and found they had no guns or knives, and then forced them to fight. The committee was tired of their quarreling and saw to it that they did fight. When one got the better of the other, and one called "Enough!" they were separated. If a fellow got tired of the other, he would go to fight when he says, but wants to fight, there is likely to be talk of fighting.

Everyone was on edge during the hurricane and flood time, and a lot of the community gossip was mean talk. Things are getting straightened out now and folks are in a better humor. We've found out pretty well what we think of one another!

WOMAN'S CLUB

Through the generosity of a friend of Mr. Sharpe, we will continue for a while longer the daily supply of milk to the school children.

Mrs. O. C. Hill was elected a member of the club.

Mrs. W. A. Adams, Mrs. Walter Bonham and Mrs. John Edwards were appointed to a committee to submit plans for the club building.

The next meeting will be held with Mrs. Fultz at the church parlor.

THE BANK'S PART IN A REGION'S GROWTH

We feel at liberty to repeat it because it is said by many disinterested observers: The Bank of Pahokee has been and is a potent power in the growth of the eastern shore of Lake Okeechobee.

This institution has always met its civic obligations, finding means to conserve its financial stability while supporting every public endeavor.

The business of the people of Canal Point and Pahokee is solicited and their good will is appreciated.

CLEWISTON, FLORIDA

PAHOKEE

Pahokee, June 2, 1925.

We want a hard surface road from Canal Point to Bacon Point right away.

A. KALTENBRUNER.

C. W. Bell returned from Tallahassee Tuesday, so as to cast his vote in the general election and also to look after the road construction.

Mrs. Charles Smith and two little boys spent the week end with Mrs. T. W. Cranford.

Mr. and Mrs. A. H. Maddox, who have been visiting in Alabama and Georgia for the past six weeks, returned to their home here the latter part of last week.

Mr. and Mrs. S. G. Sorrells and family, who have been here with Cranford and his family, moved to Okeechobee to make their home.

Rev. Earl Lewis, who is holding a revival at Plant City, came over Sunday, June 1, to preach at the morning services at the Baptist church. At the evening services Rev. A. J. York presided.

J. W. Davis received a telegram Tuesday from Frank Davis, who is ill at the Fort Meade hospital.

Mr. and Mrs. William Bloom were in town yesterday Tuesday.

Majorie and Mrs. Cochran entertained a few of their friends last Thursday night with a Hallowne party. Punch, cake and cookies were served for refreshments.

Mrs. E. C. Sealer will move Saturday, June 10, to Fort Meade, where she will be with her daughter, Wenonah, who is attending school there.

Mr. and Mrs. Aaron Mizell have moved back to their home in Georgia.

The Pahokee Woman's Club held its regular business meeting at Mrs. Tom Shepard's home Monday. One new member, Mrs. Charles M. Smith, was taken in at this meeting. The ladies of the club will hold a November 14 in Iva York's store. Coffee, sandwiches, and cream cake will be sold.

The main meeting will be a social

meeting.

The meeting will be held in charge of the social committee with Mrs. J. R. York as chairman. It will be held at the home of Mrs. Tom Shepard November 15.

Woman's Missionary Society held their regular business meeting last Wednesday at the Baptist church.

The Missionary Society of the Methodist church held their first business meeting since disbanding for the summer.

The president requests that all the members be present at the meeting to be held Tuesday November 16.

Mr. and Mrs. F. E. Tiffin and baby returned from their former home in Monticello, where they have been since there were rescued from the Moore Haven hurricane. They also visited in Okeechobee for a while. Mrs. Tiffin reports that his sister, Miss Vena Mae, is somewhat improving in health when he left last Saturday.

J. B. Crosby and family returned Wednesday to Pahokee from Okeechobee where they spent a few weeks.

Mr. and Mrs. V. P. Smith and two children returned from Okeechobee Wednesday. They are now living in Iva York's building in Pahokee.

The Missionary Society of the Methodist church held their first business meeting since disbanding for the summer.

The president requests that all the members be present at the meeting to be held Tuesday November 16.

Mr. and Mrs. F. E. Tiffin and baby returned from their former home in Monticello, where they have been since there were rescued from the Moore Haven hurricane. They also visited in Okeechobee for a while. Mrs. Tiffin reports that his sister, Miss Vena Mae, is somewhat improving in health when he left last Saturday.

MARTIN STANDS WITH OLD BOARD DEFENDS THEM

Continued from Page One

of the Association of Sub-Drainage Districts. This was subsequently adopted at a meeting of Everglades drainage commissioners held recently closed in Clewiston.

Pat KURTZ of Kissimmee had a plan for the organization of a flood control board for the Kissimmee River, to the west of the Everglades, to provide outlets for Kissimmee's river water that already comes down on the Glades. His address concluded the forenoon session.

McGOWAN'S Resolution

O. B. McGOWAN, of the 14th district of the five counties sat in the afternoon session, which opened at 2:30 at the masonic cause. The resolution on behalf of the drainage commissioners was adopted at Clewiston, Tuesday, October 19. J. E. Lovorn of Okeechobee, president of the Okeechobee meeting, proposed a flood control district for the Kissimmee River, to the west of the Everglades, to provide outlets for Kissimmee's river water that already comes down on the Glades. His address concluded the forenoon session.

Death and Resuscitation

The death of Mr. K. H. Karpf, of the five counties sat in the afternoon session, which opened at 2:30 at the masonic cause. The resolution on behalf of the drainage commissioners was adopted at Clewiston, Tuesday, October 19. J. E. Lovorn of Okeechobee, president of the Okeechobee meeting, proposed a flood control district for the Kissimmee River, to the west of the Everglades, to provide outlets for Kissimmee's river water that already comes down on the Glades. His address concluded the forenoon session.

McGOWAN'S Resolution

O. B. McGOWAN, of the 14th district of the five counties sat in the afternoon session, which opened at 2:30 at the masonic cause.

The resolution on behalf of the drainage commissioners was adopted at Clewiston, Tuesday, October 19. J. E. Lovorn of Okeechobee, president of the Okeechobee meeting, proposed a flood control district for the Kissimmee River, to the west of the Everglades, to provide outlets for Kissimmee's river water that already comes down on the Glades. His address concluded the forenoon session.

Death and Resuscitation

If the drainage board had any scouts out to get information or had any other reason, judge sentence him to jail. Learned that the drainage board had been converted by the governor's address or been intimidated. Not even the West Palm Beach Chamber of Commerce, Bryan Jennings of Jacksonville and R. K. Karpf of Moore Haven.

"The members of the state drainage board are not members of the drainage board. They are not friends but members of a drainage board; they are failures," Mr. Karpf said, early in his speech. He was applauded at every sentence. The crowd have come here

with a constructive program," Mr. Karpf continued. "They have no budget prepared, and no comprehensive plan of drainage. They have drained nothing but the treasury and they now ask what to do." Applause greeted almost every charge.

"The commissioners must be added to the proposed. Give the people who pay taxes a voice in the control and let them say how the funds are to be expended." There were more cheers and applause.

"They have been incompetent, and they have been negligent. I think it is not given generally that fault. I have heard the members say that they wished they could get rid of the job. They have been given too much to do. I would not advocate the members of the board from the project—two boards are the possible solution. It is time for the board to listen to the people of the Everglades.

"Death and Resuscitation" in the resolution is the cause of the project. The project of fit at Mount Haven is more important than all the lands of the Glades." Mr. Karpf continued, suggesting that the present board should be disbanded and a new one appointed and that the method of expenditures be determined by "local Florida representatives." Mr. Karpf told of his unsuccessful effort in 1923 to get the information from the board about the drainage district.

Governor Martin appeared to be less offended at Mr. Karpf's remarks than for the audience for his applause. He launched into a long defense against Mr. Karpf's charges and then adjourned for the day.

Stillwell Reappointed

Hannibal

A LITTLE boy, nine years old, stood before a group of people gathered on a hillside in the town of Fort Lauderdale, publisher of the Fort Lauderdale Daily News, who changed front on Everglades drainage policy. Mr. Stilwell proposed a vote of confidence in the state drainage board. The boy was Hannibal, one of the greatest military geniuses of history. His father, Hammar, was a famous general in the Roman army. Hannibal was born in the town of Carthage, which was the capital of the Phoenician Brood.

Carthage, a sovereign city, whose domains extended for hundreds of miles, was situated on the north coast of the Mediterranean. It was settled by Phoenicians, who were pre-eminent commercial and cultural greatness. In 249 B. C. Carthage clashed with Rome over the possession of Sicily. This is known as the First Punic War.

Hannibal made his nine-year-old son, Hannibal, swear eternal enemy to Rome; then took him on a campaign against Spain. The tidy crew of the Roman fleet, numbering 100,000, was made up of the best of the Carthaginian army. It first

met of power was to set about fulfilling his childhood oath. With this in view, Hannibal completed the conquest of Spain, moving to use that country as a base of supplies in his proposed war with Rome.

He then plucked a quiver with

arrows and started for the city. The Roman army, numbering 100,000, was sent to repel the invasion. The battle was fought in 218 B. C. in the Second Punic War.

The next spring Hannibal crossed the Pyrenees with 112,000 men and 10,000 horses. The Romans sent all hostile tribes before him like sheep. Hannibal, who is now in France, on his march to Italy, Hannibal swooped on his ranks, sending back all except the bravest, the most resolute. The Romans lost 20,000 men but he knew that in such a campaign as he planned, it was quality, not quantity, that counted.

He then marched on Italy, through the Apennines. The Romans sent 100,000 men after him. Hannibal and his army were beaten. The Carthaginians, in the spring of 217 B. C. had a great battle near Lake Trasimene and won it. Hannibal, however, was not at the battle. He had sent his troops to the rear to protect his home city, and he left Italy to return to Spain.

After wasting northern Italy, Hannibal, the following spring encountered a Roman army 80,000 strong (far larger than the Roman army and literally on its toes) advancing toward the city of Roma. Hannibal had advanced. None dared to oppose him. He held Rome and all Italy in the hollow of his hand.

The road to Roma was clear. But instead of continuing to the city itself, Hannibal led his army into winter quarters at Capua. When spring came, Hannibal's great army was gone. Roma was ready for him. The once invincible army had now a decided weakness.

True, for years later he ravaged Italy, once encamped within three miles of Roma and sending his soldiers parades up to the very gates of the city. But Hannibal had given up the idea of conquering Italy. His army was gone.

His star was on the decline. Yet even then the Roman general dared attack him, for in all his life he had not met an enemy personally, or in his youth, or in his younger days, but in a plan to rid Italy of the terrible foe. He crossed with an army into Carthage, to fight for the Romans. He sent in haste to Hannibal to protect his home city, and he left Italy to return to Spain.

Hannibal, with an inferior army, met Scipio at Zama, Africa, and for the first time in his life was beaten. This defeat ended the Second Punic War. Carthage was for the time crushed.

Hannibal turned his attention to Sicily, with such success that within a few years he had built up Carthage's shattered might and power. Roma, still dreading him, demanded his surrender. Sooner than invade his country in another war Hannibal voluntarily went into exile, that whenever he went Roma's hatred pursued him.

At last, brought to bay and knowing what treatment he might expect from the relentless Romans, Hannibal sucked poison from a ring he always wore. He was more bitter than long for dying before they could capture him.

What the People of the Glades Want—And How and Why

STATEMENT ADOPTED UNANIMOUSLY AT CLEWISTON TUESDAY, OCTOBER 19, AT THE MOST REPRESENTATIVE MEETING EVER HELD OF RESIDENTS OF THE LAKE OKEECHOBEE SECTION

nature change the form of control of the district.

The new form of control to be used will consist of five members residents of the district.

The election of the commissioners to be by voters who are qualified to vote for state and county officers, without regard to property owned.

The commissioners under the new form of control shall employ a competent engineer who shall have a residence and headquarters in the district.

We recommend that the Legislature enact a statute containing adequate financing provisions for the project, giving to the commissioners the power to lease bonds from time to time, as necessary, in an amount sufficient to execute the plan of reclamation.

Well, the Everglades is so good that it probably can survive federal direction if it comes.

Marglobe (Stokes)

The Tomato Which Saved the Industry in South Florida

IT IS universally acknowledged that the Marglobe Tomato has rescued the Florida Tomato Industry from the ravages of Neil Head frost. It is also acknowledged that the Marglobe is not only resistant to Neil Head frost, but has proved its superior vigor and productivity under Head and frost conditions. Last Season upwards of 1000 carloads of Marglobe were shipped out of Florida to northern markets where they were sold at a premium.

Realizing the great importance of Marglobe, the Stokes firm has been at the forefront in the commercial development of this variety. Marglobe seed as grown by Stokes has given outstanding results. No demand for it is almost unprecedented. All of Stokes' Marglobe seed has been grown from stock seed as developed by Mr. F. J. Pritchard, of the Bureau of Plant Industry, the originator of the variety.

We are now in a position to make immediate delivery of seed to those who now want it. Orders may be sent direct to our firm or to our representatives in South Florida: Stokes Supply Co., Miami, Homestead and West Palm Beach; Goulds Mercantile Co., Goulds.

Catalog Sent Promptly on Request.

ELLIOT MISTAKEN AS TO ST. LUCIE

Except That Mistaken Wasn't Thought Word Best Fitted

Charges that F. C. Elliot, chief drainage engineer of Everglades' district, gave inaccurate statements about the performance of St. Lucie canal were brought against him last week by William Griffis, editor of the Okeelanta News. Correction of other statements about the canal were called for from the chief engineer by Governor Martin at the West Palm Beach drainage conference.

Opening a session of the conference, the governor said it was inferred that the statements in certain statements he made about St. Lucie canal, had Chief Engineer Elliot appear before the audience and make a statement.

The Okeelanta News charge against the chief engineer was printed under the heading: "F. C. Elliot Is A Scandalous Lar About St. Lucie Canal. It Is Misnamed About St. Lucie Canal Is Untrustworthy." What The News said is given here as follows:

"A ditch, not a canal, to the Miami Herald, date October 21, in which F. C. Elliot, chief drainage engineer, is quoted as saying, 'The St. Lucie canal has been operating at full strength for several months, is absolutely untrue. If Mr. Elliot's statement was it was untrue and he was deliberately attempting to give the public a false impression, he would be liable to a suit which would leave him to parts of Florida."

Last summer Elliot was quoted as saying that the St. Lucie canal would be completed by October 1. Later he admitted that this had been operating at full strength for several months, was absolutely untrue. If Mr. Elliot's statement was it was untrue and he was deliberately attempting to give the public a false impression, he would be liable to a suit which would leave him to parts of Florida."

On the 21st it was still more than a ditch, not a canal. Elliot did not know this he is very ignorant of the work for which the state pays him \$6,000 a year to look after.

"Mr. Elliot is not a competent in his engineering ability than he is in his capacity to mislead the public. In his reported newspaper statement of the 21st it is then, indeed, high time that a competent engineer be put in charge of Everglades drainage."

NOTICE OF SHERIFF'S SALE

Notice is hereby given that under and by virtue of a certain writ of execution issuing out of the seal of the Circuit Court of Okeechobee County, Florida, bearing date of May 13, 1926, and issuing in that certain cause herein pending where in the plaintiff, S. R. Gray, is defendant, L. R. C. Baker, Sheriff of Palm Beach County, Florida, have levied on all that certain personal property of the plaintiff, situated in the City of Palm Beach County, Florida, and described as follows:

One Gasoline Motor Boat "Bonne" equipped with Motor and sail offered the same for sale on Monday, the 6th day of December, A. D. 1926, between the legal hours of 10 a.m. to 11 o'clock A. M. and 2 o'clock P. M. at the dock of the Baker Building, Canal Point, Florida, and shall sell the same to the highest and best bidder for cash. Said property is levied on to satisfy said execution and costs.

R. C. BAKER,
Sheriff of Palm Beach County, Florida.

By W. H. Lawrence, Chief Deputy.

R. E. Hamrick,
Attorney for Plaintiff.

Okaloosa, Florida.

Nov. 5-12-19-26; Dec. 3, 1926.

D. E. TEDDER, Recorder.

OKEELANTA

(Received too late for last week.)

OKELANTA, Oct. 25.—Dave Hetherington returned to his home in the Glades the past week. He had worked for some time in Miami after the storm. The bridge house is his headquarters while repairing the damage done by hurricane to his own cabin.

The roof on store carried away during the "big blow" has been replaced by E. L. Cooper, assisted by Ira Jackson and W. E. Kitchman.

The Ajinaga family with the exception of the grandfather, who has had a small contract, moved to Palm Beach where Bert has been employed as a truck driver and where the two sons are now working in an opportunity to attend school.

W. A. Matherough left for a long visit at Tampa. The length of Alexander's stay is determined by his various connections on the shore of the lake.

It was gratifying to read in The News a plea for charitable indulgence of the L. E. Board by their colleague of the long suffering settlers who since 1922 had had his "blind end" in the water continually.

When this pest persists, it seems, perhaps, that the state and county officials we are sinning against others" because we refuse to depart from the Everglades, our homes and lands being despised of one all around us, who could hear the acreage which we occupied 17 years ago, and on which we paid taxes for 13 years to officials, who in their stamp offices would gold tipped pens, but who are now as beaten as our forefathers that lining their victims to the yardarm and made them walk the plank. Let's get it in Galt's public place in the public eye. In a few weeks after the hurricane we are anxious to be either a state or county representative.

"I am not fit to be a soul when considering the imminent doom we pioneer settlers find to meet over a period of years and their appearance no end yet."

These items are contained from a report made by our friends from the state from this place. There we no doubt a representative of the Okeelanta at the gathering at Palm Beach, V. W. R.
